

Slick Full Website Template

Admin Installation Guide

Copyright (c) 2009 OXYLUS Development

Website : <http://www.oxylusflash.com>

Email: contact@oxylusflash.ro

Support only on our public forum: <http://forum.oxylusflash.com/slick-full-website-template-cms-2-skins/>

System Requirements

Php 4+ / Php 5+ (with gd 2.0)
Mysql 4+

Installing the site files

Unzip all the files to your website root folder.

After you install the template with cms please use the login info bellow to access the admin (you can change the login info inside the admin - recommended)

user: admin

pass: test

Admin panel location :

http://sitename/admin (meaning wherever you upload the template, just add a /admin/ in the url to access the admin panel)

Make sure admin/site.xml isn't accessible from web as it contains your login info. If you have apache for webserver and it loads the .htaccess there should be no problem. Else if you have no other solution then rename it to something no one could guess (laskjf1l39841u2jkljfase83.xml and put the same name in admin/config.php).

Configure Database

Please check the following tutorial for creating and importing the database: <http://forum.oxylusflash.com/slick-full-website-template-cms-2-skins/1912-tutorial-import-database.html>

Create the database on your server and then put your information in "admin/site.xml" :

OXYLUS FLASH

Mobile: +40 (0) 742 094 758

+40 (0) 788 182 448

+40 (0) 788 182 593

info@oxylusflash.com

<http://www.oxylusflash.com>

```
<database type="mysql">
  <server>server</server>
  <login>username</login>
  <password>password</password>
  <default>database_name</default>
</database>
```

Setting Permissions

Please set chmod 777 on the following folders:

```
./upload
./upload/ about
./upload/banners
./upload/clients
./upload/contact
./upload/galleries
./upload/homepage
./upload/music
./upload/pages
./upload/portfolio
./upload/resumes
./upload/services
./upload/skins
./upload/tmp
```

Admin/Front files location

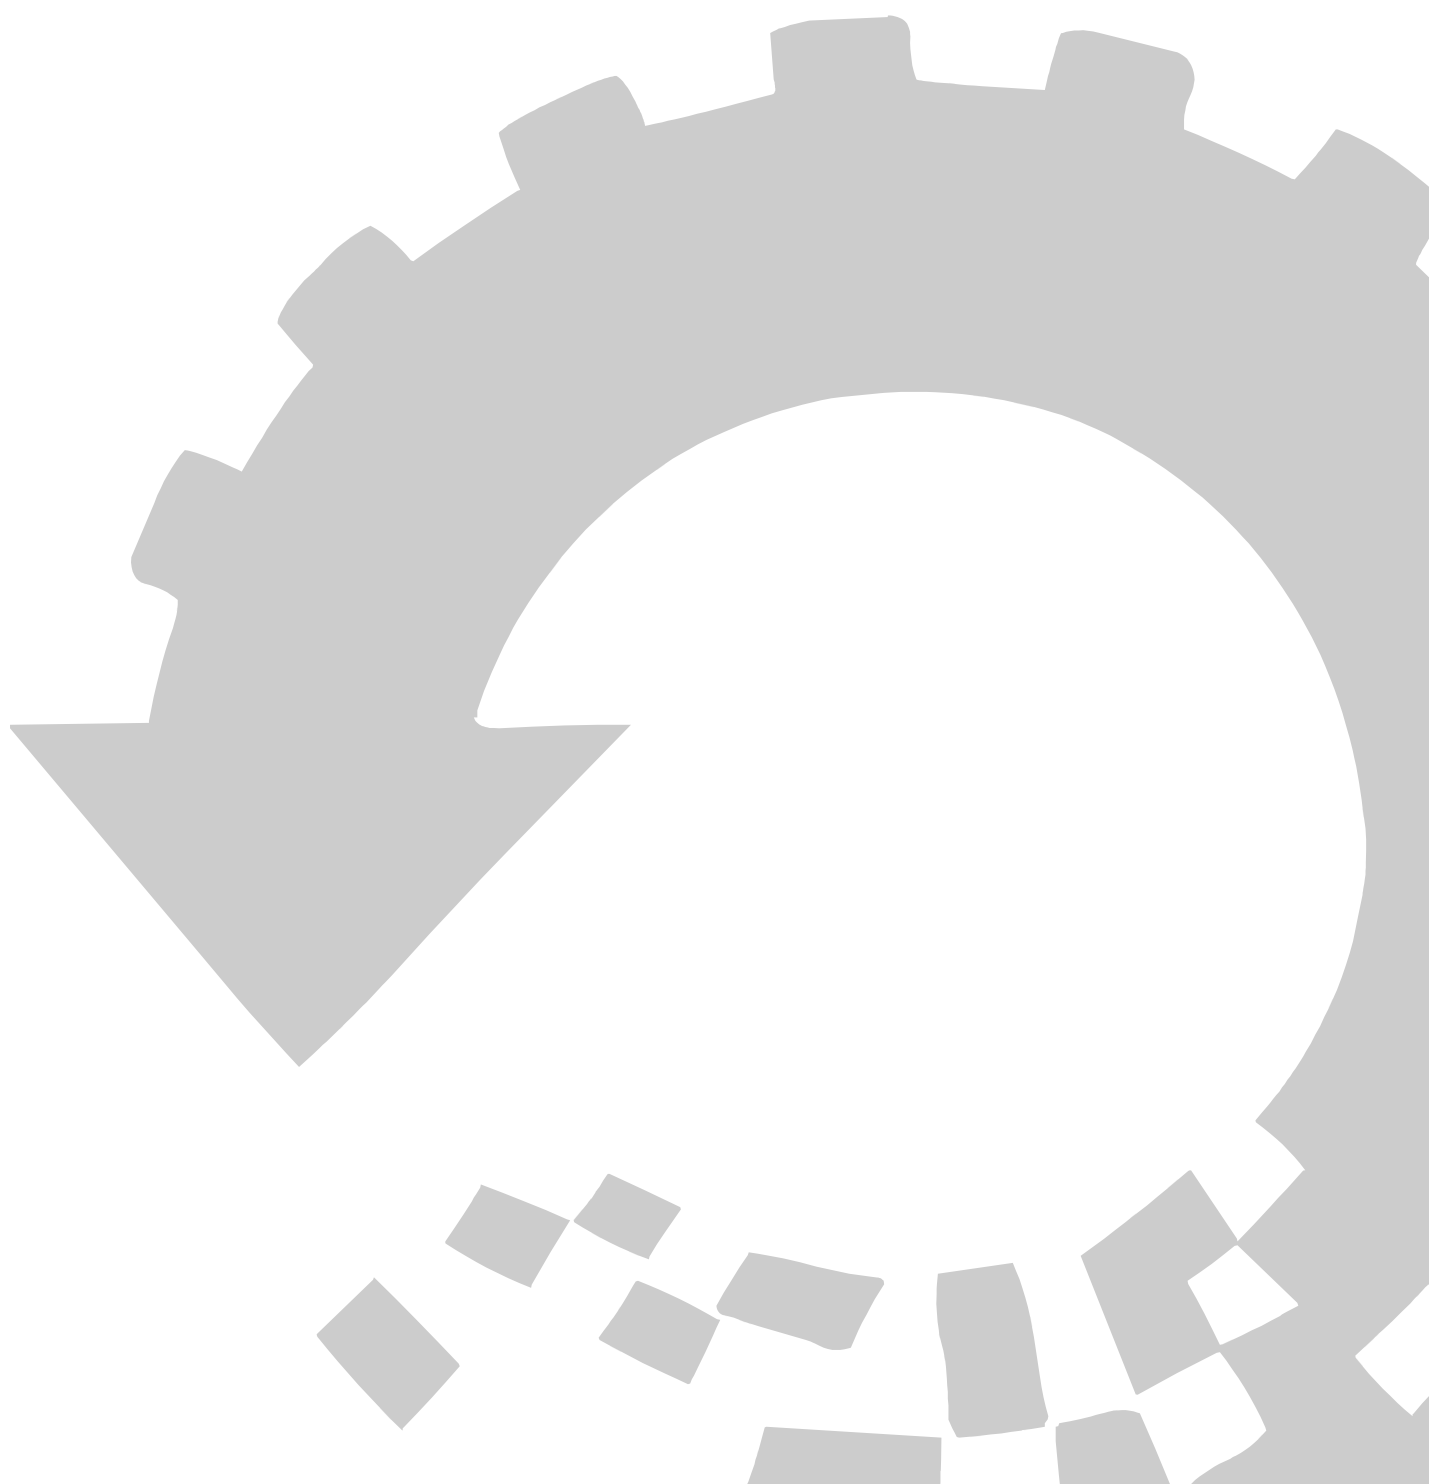

1. All php files for all modules for this templates are located in ./admin/modules/oxymall/plugins/ admin.*.php are loaded by the admin panel while site.*.php are loaded by the frontend.
2. The admin interface (forms, listings, searches etc) is generated from all the xmls located in ./admin/modules/oxymall/plugins/forms/
3. The frontend xmls templates are located in ./admin/modules/oxymall/plugins/templates/

For admin usage tutorials, please check out the following video Tutorials:
