FLASH CHAT V1.5 DELUXE - TOOLS

Upload the entire **tools** folder to the same directory as the chat.

Open **chatmonitor.php** and **viewhistory.php** in your browser.

chatmonitor.php
Shows the previous 30 chat messages and the page updates automatically every 10 seconds. Perfect for monitoring chat discussions while not being connected to the chat.

viewhistory.php
Shows the entire chat message history retrieving the data from the chatarchive.xml

Note: Remember to reset chatarchive.xml frequently to prevent the file size from getting too large. This could cause problems when chat users use the /history command. The size should not exceed 150 KBs.
